July XX, 2022

The Honorable Charles E. Schumer
Senate Majority Leader
United States Senate
S-221, US Capitol
Washington, DC 20510

The Honorable Mitch McConnell
Senate Minority Leader
United States Senate
S-230, US Capitol
Washington, DC 20510

Dear Leader Schumer and Leader McConnell:

On behalf of the XX undersigned organizations representing the Nursing Community Coalition (NCC), we urge you to take up and pass the bipartisan House-passed bill, H.R. 6087, the Improving Access to Workers’ Compensation for Injured Federal Workers Act. That bill would retire outdated barriers in the Federal Employees’ Compensation Act (FECA) that limit the ability of Nurse Practitioners (NPs) to diagnose and oversee the care and treatment federal employees who are injured or become ill in the course of their employment. The NCC is a cross section of education, practice, research, and regulation within the nursing profession representing Registered Nurses (RNs), Advanced Practice Registered Nurses (APRNs),

1 nurse leaders, students, faculty, and researchers. We appreciate your continued efforts to improve the health care system for our nation’s federal employees and strongly support passage of H.R. 6087.

Currently, federal employees can select an NP as their health care provider under the Federal Employees Health Benefits Program (FEHPB), and the majority of states authorize NPs to provide the diagnosis and treatment for a workplace related injury. However, contrary to the workers’ compensation process in most states, FECA requires that only a physician can make the diagnosis, certify the injury and extent of the disability, and oversee the patient’s treatment and care. This barrier places an additional burden on the over two million federal employees, depriving them from receiving health care from their provider of choice, as well as hindering timely access to care and continuity of care.

The Improving Access to Workers’ Compensation for Injured Federal Workers Act would update the federal workers’ compensation program and authorize NPs to certify disabilities and oversee treatment for injured or ill federal employees under FECA. This would improve access to health care for injured or ill federal employees, particularly in rural and underserved communities, and align the federal workers’ compensation program with state law. In fact, the Congressional Budget Office

1 APRNs include certified nurse-midwives (CNMs), certified registered nurse anesthetists (CRNAs), clinical nurse specialists (CNSs) and nurse practitioners (NPs).
(CBO), “estimates that enacting H.R. 6087 would have an insignificant net effect on direct spending,” and may even get injured federal employees back to work more quickly. By updating FECA to authorize federal employees to select their health care provider of choice when they are injured or become ill in the course of their federal employment, greater access, overall efficiency and better continuity of care can be achieved.

We appreciate your consideration of this important legislation and strongly urge you to take up and pass the Improving Access to Workers' Compensation for Injured Federal Workers Act this Congress. Should you have any questions or if the Nursing Community Coalition can be of any additional assistance please contact the coalition’s Executive Director, Rachel Stevenson, at rstevenson@thenursingcommunity.org or at 202-463-6930, ext. 271.

Sincerely,
